

Hank Duhaime

Seattle, WA | hello.hank.d@gmail.com | [linkedin.com/in/henryduhaime](https://www.linkedin.com/in/henryduhaime) | hankduhaime.com

summary

A creative technologist with 8+ years of experience designing playful, embodied interactions. Works at the intersection of engineering, design, and research to turn ambiguous ideas into testable prototypes in software and hardware alike.

work history

Senior Product Design Prototyper | Meta Reality Labs | Redmond, WA | February 2024 – March 2026

- Developed novel interaction concepts and research prototypes for nascent R&D technologies across AR/VR, haptics, wearables, AI, and robotics
- Prototyped low- and high-fidelity experiences to support design exploration, value assessment, user studies, executive demos, and conferences
- Collaborated with cross-functional partners to document research insights, build reusable systems and code libraries, and facilitate design workshops

UX Designer III | Crystal Equation Corporation | Redmond, WA | January 2022 – January 2024

converted to full-time at Meta in February 2024

- Prototyped AR/VR and wrist-haptics interaction concepts onsite at Meta Reality Labs Research

Experience Designer L1 | Publicis Sapient | Seattle, WA | October 2020 – January 2022

- Designed digital products for Mercedes-Benz USA through the creation of sketches, wireframes, interaction flows, and click-through prototypes
- Generated prototype-driven insights for digital business transformation concepts within a specialized rapid innovation lab

UX Designer | SpellBound AR | Ann Arbor, MI | July 2020 – October 2020

Graduate Teaching Assistant | Georgia Tech College of Design | Atlanta, GA | August 2019 – May 2020

- Mentored graduate students concepting, designing, and fabricating interactive physical installations, and lectured on physical computing topics such as Arduino, addressable LEDs, and hardware troubleshooting

Experience Design Intern | Second Story Interactive Studios | Atlanta, GA | June 2019 – August 2019

- Developed flow diagrams, videos, and software prototypes to represent interactive physical installations to prospective clients, and conducted two rapid prototyping explorations of emergent physical sensing technologies

UX Designer / Engineer | SpellBound AR | Ann Arbor, MI | June 2016 – July 2018

- Designed, programmed, and shipped five mobile AR games used in 20+ pediatric hospitals to improve the patient experience
- Patented a novel AR practice of leveraging multiple visual targets to create scalable, room-filling content

skills

Digital Prototyping: Rapid prototyping, Games, AR, and VR (Unity / Unreal), AI (Claude Code), Generative art (Processing), Scripting (Python / C#), Web (HTML / CSS / JS)

Physical Prototyping: Digital fabrication (3D printing, laser cutting), CAD (Fusion 360), Electronics and physical computing (Arduino), Model making

UX Design: Product development, Interaction flows and journey maps, Wireframing (Figma), Workshops (Figjam), Pitching and presenting, Video editing (Premiere)

education

MS Human-Computer Interaction | Georgia Institute of Technology | Atlanta, GA

BSE Computer Science | University of Michigan | Ann Arbor, MI

publications & patents

Enabling Immersive, Fantastical Interactions in Virtual Reality Using EMG and Haptics CHI Workshop, 2025

Explorations of Wrist Haptic Feedback for AR/VR Interactions with Tasbi UIST Demo, 2022

Safecracker: Exploring Immersion Through Audio and Object-Based Controllers CHI Student Games (1st Place), 2020

System and Method for Delivering Augmented Reality Using Scalable Frames to Pre-Existing Media Utility Patent, 2017
